

Tejas Mistry

Crafting Software, AI Systems & AR/VR Experiences

Profile

Computer Engineering student with hands-on experience in full-stack web development, backend systems, and intelligent applications. Successfully completed 3+ academic and real-world projects involving secure authentication, database-driven applications, and system integration. Strong foundation in problem-solving, software design, and practical implementation of modern technologies.

Education

GSFC University 2023 - 2027
Computer Science & Engineering
7.92 CGPA

BHS Bagikhana 2021 - 2023
Higher Secondary
53% GSCB

Awards & Certifications

- Unity Essentials
- VR Development
- Azure AI Fundamentals (AI-900)
- Programming Basics For Cyber Security Engineers
- Programming Basics For Automation Engineers
- Python Essentials

 Tejas Mistry

Work Experience

Intern at Technospot Technologies
Dec 2024 - Jan 2025 - Vanilla JS

Intern at Softnexus Technology
Nov 2025 - Dec 2026 - SQL Developer

Projects

Gatherly

React, Node.js, Express, PostgreSQL, JWT

- Developed a full-stack social media platform with authentication and profile management
- Designed REST APIs and integrated PostgreSQL for efficient data handling

Smart Traffic Management System

Python, OpenCV, Android, ESP8266

- Developed an AI-based traffic control system using real-time vehicle detection (MobileNet-SSD)
- Automated traffic signals dynamically based on vehicle density
- Inspired by Smart India Hackathon problem statement

Contact Management System

Java

- Built a CRUD-based application for managing contacts
- Implemented add, search, update, and delete functionalities

PDF Tool

JavaScript

- Developed a lightweight web-based tool for basic PDF operations
- Enabled file merging and manipulation directly in the browser

Bill Generator

C Language

- Built a console-based billing system for invoice generation
- Implemented structured input handling and calculation logic

To-Do List Application

JavaScript

- Developed a task management app for organizing daily activities
