

PROFESSIONAL SUMMARY

Computer Engineering professional with hands-on experience developing scalable software solutions across full-stack development, database systems, AI-powered applications, and immersive AR/VR technologies. Delivered 8+ real-world projects, contributing across the complete software development lifecycle, including requirement analysis, system design, database architecture, development, testing, and optimization.

Experienced in building secure and data-driven applications with expertise in backend development, SQL, authentication systems, analytics dashboards, and efficient data management. Developed solutions focused on scalability, performance, maintainability, and user experience while applying strong software engineering principles.

Through internships and project-based development, I have gained practical experience in designing, implementing, and optimizing software solutions while adapting to emerging technologies and solving complex technical challenges. Demonstrated ability to collaborate effectively, write maintainable code, and deliver high-quality applications within defined timelines.

Passionate about designing reliable software systems, solving real-world engineering challenges, and creating technology-driven solutions with measurable impact.

Dedicated to transforming complex requirements into practical, user-centric software solutions by combining technical expertise with a strong focus on quality, innovation, and continuous improvement.

KEY EXPERTISE

Software Development AIML Deep Learning API Databases PostgreSQL Hosting Product Management
Data Engineering C++ JavaSE Object Detection Authentication OpenCV Client Services

EDUCATION

GSFC University

2023 - 2027

B.Tech. - Computer Science & Engineering - School of Technology | CGPA: 7.92 / 10

Baroda High School Bagikhana, Vadodara

2023

12th | GSEB | Percentage: 56.70 / 100

Baroda High School, Vadodara

2021

10th | GSEB | Percentage: 73 / 100

INTERNSHIPS

Startups Friend | IT / Computers - Software

25 May, 2026 - Present

Software Developer

Key Skills:

SQL Agile ReactJS API Software Development Hosting NodeJS SaaS Functional Testing API Testing
Client Services

During my internship, I contributed to the end-to-end development of enterprise-grade web applications, working across both frontend and backend technologies. I was involved in designing scalable systems, implementing secure authentication workflows, and building intuitive user experiences for complex business processes.

My responsibilities included developing responsive user interfaces, integrating REST APIs, managing relational databases, implementing role-based access control, and creating automated workflows for data processing and reporting. I also worked on secure email verification, authentication systems, PDF generation, dashboard development, data visualization, and performance optimization. In addition to software development, I participated in requirement analysis, feature planning, UI/UX improvements, and system architecture discussions. I collaborated closely with stakeholders to translate business requirements into reliable technical solutions while ensuring scalability, security, and maintainability.

Soft Nexis Technologies | IT / Computers - Software

01 Dec, 2025 - 01 Jan, 2026

SQL Developer Intern

Key Skills: Normalization SQL

Worked on relational database management tasks including database design, SQL query development, data retrieval, data manipulation, and performance optimization. Assisted in maintaining data integrity, writing complex joins and reports, and supporting backend database operations while following database best practices.

Key Skills: Web Design Web Development Front-End Web Development Javascript

Worked on developing interactive web applications using Vanilla JavaScript, HTML, and CSS. Implemented dynamic user interfaces, handled DOM manipulation and event-driven functionality, integrated REST APIs, and improved application responsiveness through clean, maintainable code.

PROJECTS

Enterprise Future Readiness Assessment Platform01 Jun, 2026 - 29 Jun, 2026

Mentor: Nikhil Adroja

Key Skills: Software Development PostgreSQL Authentication Database Security User Experience

During my Software Development Internship, I contributed to the development of an enterprise assessment and analytics platform featuring secure authentication, role-based dashboards, automated PDF report generation, interactive data visualizations, and a responsive full-stack web application, with a strong focus on scalability, security, and user experience.

Air Traffic Controller01 Mar, 2026 - 10 May, 2026

Mentor: Vishal Harith | Team Size: 3

Key Skills: C# Unity3D Game Development AR/VR

Project Link: <https://play.unity.com/api/v1/games/game/a564be52-eb2c-4b93-83a6-7d3c5140b342/build/latest/frame>

Developed an immersive Air Traffic Controller simulation using Unity and XR technologies to replicate real-world airport ground and flight management. The application enables users to monitor incoming aircraft, assign gates and parking stands, manage landing and taxi operations, and coordinate aircraft movement through an interactive AR/VR environment. The project emphasizes spatial interaction, real-time decision-making, and realistic airport workflows, providing a hands-on simulation experience while demonstrating skills in XR development, interactive system design, and simulation programming.

Gatherly15 Jan, 2025 - 25 Sep, 2025

Team Size: 3

Key Skills: ReactJS Node.js PostgreSQL Full Stack Development Software Engineering

Project Link: <https://gatherly-lemon.vercel.app/>

Developed a full-stack social media platform that enables users to connect, share content, and interact in a secure and engaging environment. The platform includes user authentication, public and private profiles, follow requests, posts, likes, comments, notifications, and profile management. Built with a scalable architecture, the project demonstrates expertise in designing responsive user experiences, implementing secure authentication, managing relational data, and developing feature-rich web applications.

Smart Traffic Management System16 Apr, 2025 - 06 May, 2025

Mentor: Mansi Rastogi | Team Size: 4

Key Skills: C Programming ESP32 OpenCV MobileNetSSD IP Addressing

Project Link: <https://github.com/tejas2435/Smart-Traffic-Signals-using-AI-Object-Detection>

Developed an AI-powered Smart Traffic Management System that dynamically controls traffic signals based on real-time vehicle density and prioritizes emergency vehicles for faster clearance. The system uses computer vision to detect and classify vehicles, analyzes traffic conditions, and automatically adjusts signal timings to improve traffic flow and reduce congestion. Designed as an intelligent traffic optimization solution, the project demonstrates expertise in AI, computer vision, real-time data processing, and IoT-enabled automation

Contact Management System01 Feb, 2024 - 27 Mar, 2024

Key Skills: Java

Project Link: <https://github.com/tejas2435/Contact-Managment-System-Java->

Developed a Contact Management System in Java that enables users to efficiently add, search, update, and delete contact records through an intuitive interface. The application supports contact data import and export using file management, ensuring reliable data storage and easy portability. The project demonstrates proficiency in Java programming, object-oriented design, file handling, data validation, and implementing efficient CRUD operations.

PDF Tools

Key Skills: Javascript Web Design

Project Link: <https://github.com/tejas2435/PDF-Merger->

Developed a web-based PDF Management Tool using Vanilla JavaScript that enables users to upload, organize, preview, merge, split, and download PDF documents through an intuitive interface. Implemented client-side file processing, interactive document handling, and responsive user interactions to provide a seamless document management experience while demonstrating proficiency in JavaScript, DOM manipulation, file handling, and browser-based application development.

Restaurant Bill Generator

Key Skills: C language

Project Link: <https://github.com/tejas2435/Bill-Generator-C-Language->

Developed a Restaurant Bill Generator using the C programming language to automate the billing process through a menu-driven console application. The system allows users to select menu items, calculate item-wise and total costs, generate accurate bills, and display formatted invoices efficiently. The project demonstrates proficiency in C programming, structured programming concepts, functions, conditional statements, loops, and file handling for bill generation and record management.

ASSESSMENTS / CERTIFICATIONS

Cloud Computing

Provider: NPTEL

Aggregate: 65 / 100

Key Skills: Cloud Computing Cloud Services

Cloud computing is a scalable services consumption and delivery platform that provides on-demand computing service for shared pool of resources, namely servers, storage, networking, software, database, applications etc., over the Internet. It is a model for enabling ubiquitous, on-demand access to a shared pool of configurable computing resources, which can be rapidly provisioned and released with minimal management effort. This course will introduce various aspects of cloud computing, including fundamentals, management issues, security challenges and future research trends.

SEMINARS / TRAININGS / WORKSHOPS

Unity VR Development Institute Name: Unity Technologies

26 Jan, 2026 - 09 Mar, 2026

Key Skills:

3D Visualization Game Engine Unity 3D Unity Engine Virtual Reality (VR) VR VR Audio VR Developer
VR Ergonomics VR Experience VR Interaction VR Optimization VR Project Setup VR Scale

The Unity VR Development Pathway validates the skills and competencies to be a proficient junior developer creating VR experiences and working in the VR industry.

Unity Essentials

01 Jan, 2026 - 18 Jan, 2026

Institute Name: Unity Technologies

Key Skills:

2D & 3D Design 2D Assets 3D Assets Basic C# Scripting Content Creation Real-time Creation Unity Editor
Unity Engine

Unity Essentials is the pathway for interested creators who are just getting started with Unity and real-time content creation. To achieve this pathway badge participants will create their first simple interactive experience with Unity. Learners who achieve the Unity Essentials Pathway badge can define real-time production, use the essentials features of the Unity Editor, navigate in 3D space, create and manage Scenes, GameObjects, Prefabs, and publish a simple Unity project.

Python Essentials 2

19 Sep, 2024 - 19 Oct, 2024

Institute Name: Cisco

Key Skills: Object-Oriented Programming Python Polymorphism Inheritance

Cisco, in collaboration with OpenEDG Python Institute, verifies the earner of this badge successfully completed the Python Essentials 2 course and achieved the student level credentials. Earners have knowledge and skills in intermediate aspects of Python programming, including modules, packages, exceptions, file processing, as well as general coding techniques and object-oriented programming (OOP), and prepares the learner for the PCAP – Certified Associate in Python Programming certification.

CO-CURRICULAR ACTIVITIES

- Vice Chairman of ACM Student Chapter

PERSONAL INTERESTS / HOBBIES

- Video Editing
- photography
- Instagram Reels
- Travelling
- Gamming
- Eating
- Enjoying
